Printer Compliance Insert

Note: This equipment may be used on an IT power system.

For Users in English Speaking Regions (en)

Caution: This marking indicates that the user should read all included documentation before use.

The users of this product are cautioned to use accessories and peripherals approved by manufacturing company. The use of accessories other than those recommended, or changes to this product that are not approved by manufacturing company, may void the compliance of this product and may result in the loss of the user's authority to operate the equipment.

Caution: For power supply, use manufacturing company. No user-serviceable parts.

FCC Digital Emissions Compliance

This equipment has been tested and found to comply with the limits for a CLASS A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at own expense.

Canadian Digital Apparatus Compliance

This Class A digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations.

CE Marking: Refer to the Declaration of Conformity for a list of the EU Directives and Standards that this product complies with.

Für Anwender in Deutschland (de)

Vorsicht: Diese Kennzeichnung weist darauf hin, dass der Benutzer vor dem Gebrauch alle mitgelieferten Unterlagen lesen soll.

Die Benutzer dieses Produkts werden darauf hingewiesen, nur Zubehörteile und Peripheriegeräte zu verwenden, die vom Hersteller genehmigt sind. Falls nicht empfohlene Zubehörteile verwendet oder an diesem Produkt Änderungen vorgenommen werden, die nicht vom Hersteller genehmigt sind, kann dadurch die behördliche Konformität des Produkts verletzt werden und der Benutzer die Berechtigung zur Verwendung des Geräts verlieren.

Vorsicht: Nur das beigelegte original Netzteil verwenden. Enthält keine Teile, die vom Benutzer gewartet werden können.

CE-Kennzeichnung: Die Konformitätserklärung enthält eine Liste der EU-Richtlinien und Normen, denen das Produkt entspricht.

Warnhinweis

Dies ist ein Produkt der Klasse A. In Wohnumgebungen kann dieses Produkt Funkstörungen verursachen. In diesem Fall obliegt es dem Anwender, angemessene Maßnahmen zu ergreifen.

Pour les utilisateurs canadiens et français (fr)

Attention: Ce marquage indique que l'utilisateur doit, avant l'utilisation, lire toute la documentation incluse.

Attention: Pour la source d'alimentation, utilisez fabricants. Il ne contient aucune pièce réparable par l'utilisateur.

Utilisateurs de ce produit sont avisés d'utiliser des accessoires et des périphériques approuvés par fabricants.

L'utilisation d'accessoires autres que ceux recommandés ou des changements à ce produit qui ne sont pas approuvés par fabricants, peuvent annuler la conformité de ce produit et mettre fin au droit qu'a l'utilisateur d'utiliser l'équipement.

Conformité aux normes canadiennes sur les appareils numériques

Cet appareil numérique de la classe A respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.

AVERTISSEMENT: Il s'agit d'un produit de classe A. Dans un environnement domestique, ce produit pourra provoquer des interférences radio auquel cas l'utilisateur pourrait avoir à prendre de mesures adéquates.

適用於臺灣使用者 (zh-tw)

注意：此標誌表示使用者應在使用前先閱讀所有隨附的文件。

本產品的使用者必須小心使用製造商許可的配件與週邊設備。

使用非上述建議的配件，或是在未經製造商許可的情況下變更本產品可能會使得本產品的相容性失效，並且使得使用者喪失操作設備的權力。

請使用製造商電源。無使用者可自行維修之零件。

사용자안내문

이 기기는 업무용 환경에서 사용할 목적으로 적합성평가를 받은 기기로서 가정용 환경에서 사용하는 경우 전파간섭의 우려가 있습니다

FCC COMPLIANCE STATEMENT

FOR AMERICAN USERS

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

TO WHICH THIS DECLARATION RELATES

IS IN CONFORMITY WITH THE FOLLOWING STANDARDS

SAFETY INSTRUCTIONS

Please read the following instructions carefully.

- Keep the equipment away from humidity.
- Before you connect the equipment to the power outlet, please check the voltage of the power source.
- Make sure the printer is off before plugging the power connector into the power jack.
- It is recommended that you connect the printer to a surge protector to prevent possible transient overvoltage damage.
- Be careful not to get liquid on the equipment to avoid electrical shock.
- For safety and warranty reasons, ONLY qualified service personnel should open the equipment.
- Do not repair or adjust energized equipment under any circumstances.
- The power supply cord(s) must be plugged into socket-outlet(s) that is/are provided with a suitable earth ground.

CAUTION

- Danger of explosion if battery is incorrectly replaced. Replace only with the equivalent type recommended by the manufacturer.
- Dispose of used batteries according to the manufacturer's instructions.
- Only use with designated power supply adapter model.
- Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Specifications are subject to change without Note

1 Thermal Label Printer

Rear View

(Interface might differed per Optional interface)

Open Top Cover

2 Printer Installation

2-1 Media Installation

- Lift up the top cover

2-2 Printing Mechanism Opening

- Push the Print frame hook on the side to head up the print frame.

2-3 Ribbon Installation

(4 inch Ribbon)

- Plug a new ribbon roll into the ribbon Shaft

Install the empty ribbon core into ribbon shaft

Stick the ribbon with the Ribbon Rewind units and rolling 2~3 cycles.

(8 inch Ribbon)

Install the empty ribbon core into ribbon shaft

Stick the ribbon with the Ribbon Rewind units and rolling 2~3 cycles

➤ **Install the Ribbon into the Barcode Printer**

Follow the below drawing to install the ribbon in position.

2-4 Label Installation

➤ Label Roll Ass'y

Put the label roll into media spindle and then install the label roll stopper on the both side to make the media roller in position.

➤ Label Holder Stand

Follow the direction to secure the core adaptor

Follow the Arrow mark and No. to assemble the stand.

Follow the Arrow mark and No. to assemble the stand.

➤ **Label Installation**

Step 1. Following the arrow mark and No. to put the label roll holder into position.

Step 2. Following the below arrow mark and direction to put the label roll into position.

Step 3. Put the label roll into label roll stand.

Step 4. Put the label pass through the label guide and then adjust the suitable label width according to.

**Inside Label Roll
Installation**

**Outside Label
Roll Installation**

**Fanfold paper
Installation**

2-5 Sheet Paper Holder Installation

Open the top cover

Press the print head hook on both sides to open the TPH

Install the Sheet paper Holder and Screw the screw.

※Please remember to move the sensor to the position of scale 0.

Screw the screws.

Close the TPH and top cover

2-6 Connection with PC

1. Make sure the Barcode Printer power is in off status.
2. Put the power cord one side on the power plug, one side on the power adaptor.
3. Connect the transmission cable in between PC and printer (The cable might be differed according to option selected) .
4. After the media (ribbon) installation, then power on the printer, wait the status turned to ready.

HD830i Barcode Printer

(The interface might be differed upon
the options been selected)

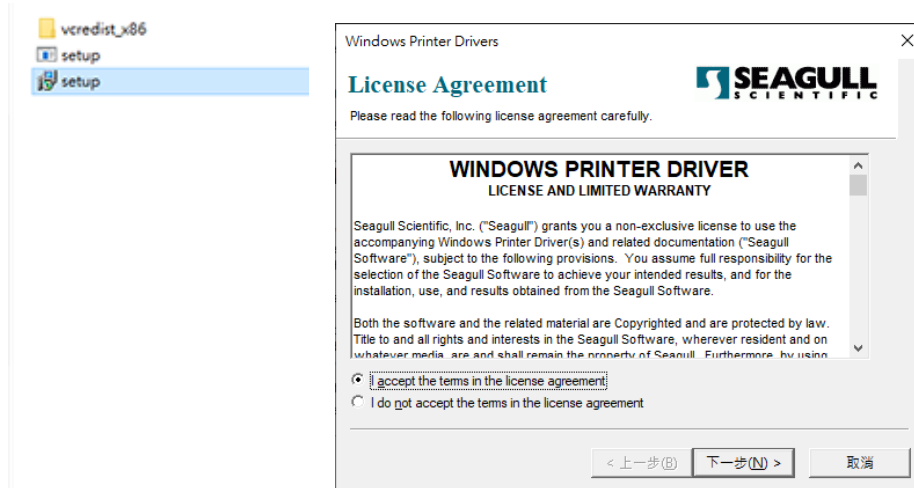

2-7 Driver and Golabel II Installation

Relevant documents and software can be found and download on GoDEX official website. (www.godexintl.com)

Driver

Step1. Click the compressed driver file in the folder.

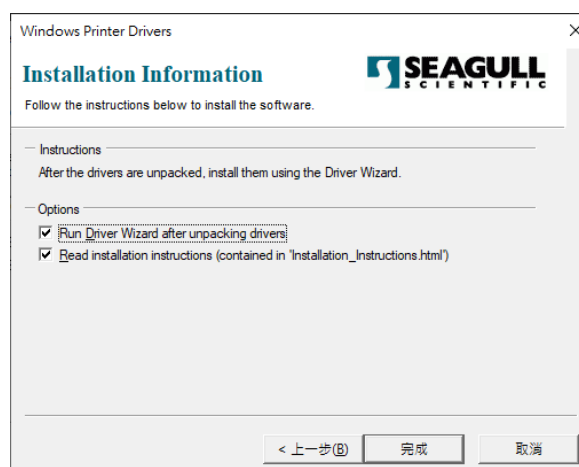

Select "I accept the terms in the license agreement." and click "Next".

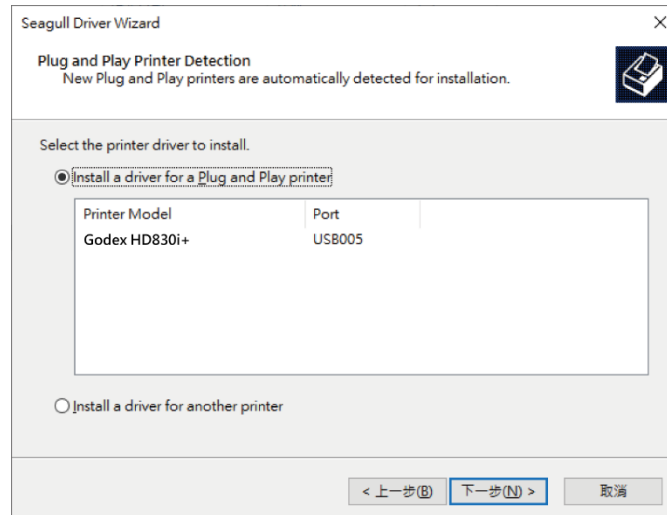

Step2. Select the path to unzip and click "Next"

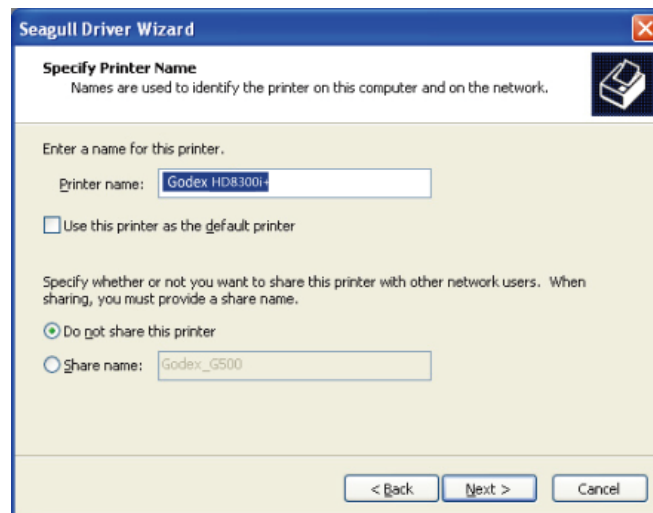

Step3. Click "Finish" and open the Driver Wizard

Step4. The driver installation wizard will automatically detect the model, please click "Next" to start the installation.

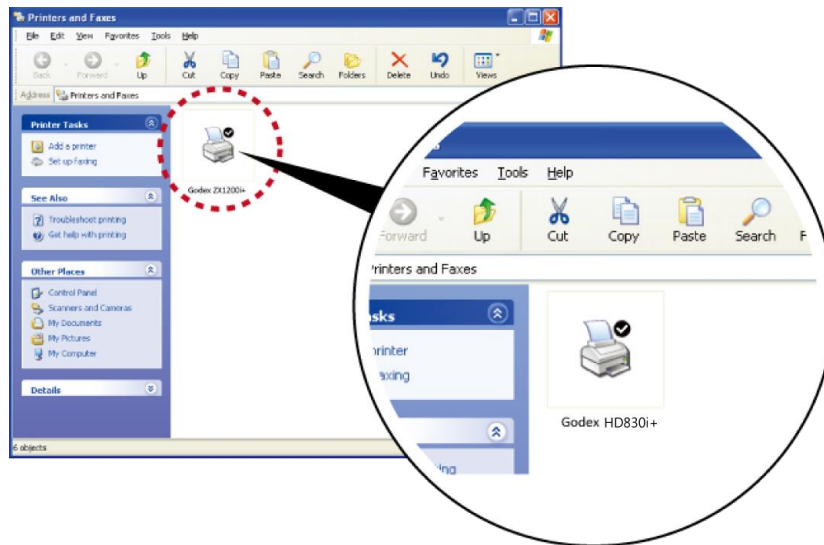

Step5. After entering the printer name, click "Next"

Step6. After confirming the settings, click "Finish" to install.

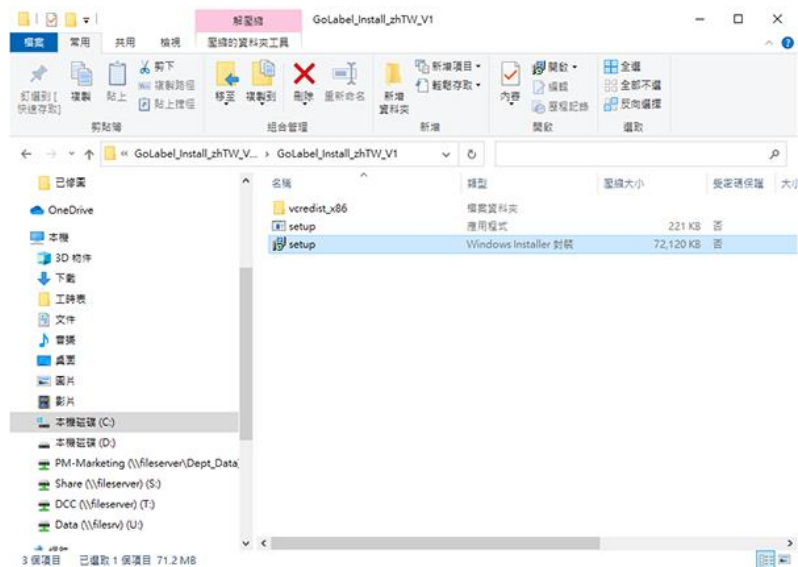

Step7.Once the driver installation is complete, the new printer should appear in the "Printers and Faxes" folder.

Installing GoLabel II

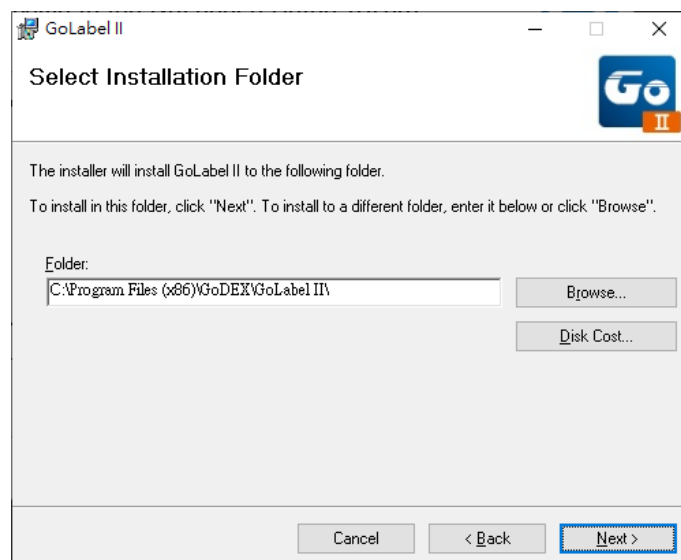

Step1. Click the installer in the folder to install.

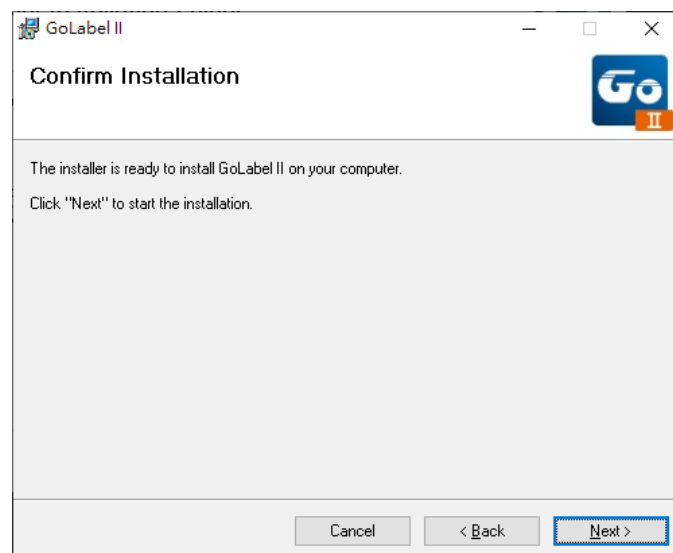

Step2. After entering the installation screen, click “Next”.

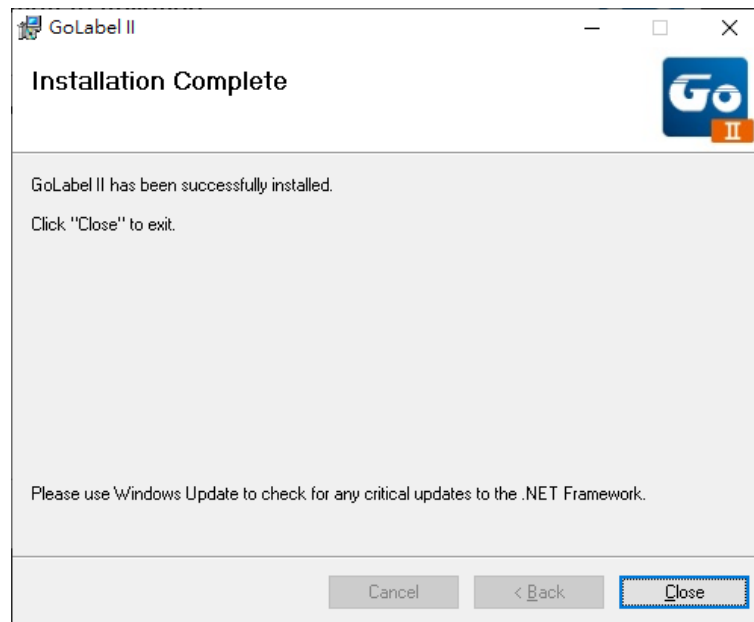

Step3. After selecting the folder to install, click “Next”

Step4. Click Next to start the installation.

Step5. Finish installation

3 Printer Operation

3-1 Printer Operation Interface

Standby key

Make sure the power switch is on, and when press the "Standby key", the Touch panel (LCD Display) will light up and show "Ready". When press and hold the "standby key" in 3 seconds, then the printer will be getting into "standby" mode.

Feed key

When you press the FEED button, the printer moves the label to the defined stop position. If you are using continuous labels, pressing the FEED button will move label stock until you release the button again. If you are using individual labels, pressing the FEED button will move only one label. If the label does not stop at the correct position, please run the auto calibration (See Section 3-6. for the label size calibration function) on the label stock.

Pause _ Feed key

If you want to pause the printing, just press the feed key then the printer will be on pause status, besides, the LCD will show "Pause" till you press the feed key again the printer will not print any further.

EX, if the printer is setting for 10 pages printing, when user press the feed key during the 2nd pages printing, the printer will stop printing till feed key been pressed again.

Cancel Printing_ Feed key

Press and hold feed key in 3 seconds during printing, the Printer will be backed to standby mode and LCD will display "Standby" and the printing job has been cancelled.

EX. If the printer is setting for 10 pages printing, when user press the feed key during the 2nd pages printing, the printer will stop printing from the 3rd page and back to Standby condition since the rest printing job has been cancelled.

3-2 LCD Operation Introduction

Getting Started

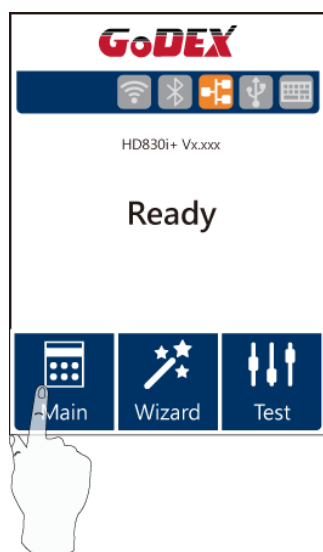

If the printer is on "ready to print" status, the LCD screen should display the message "Ready" on the screen.

Use touch gestures to get around the main screen and other screen for setting.

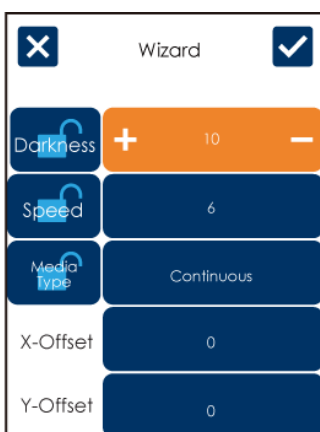

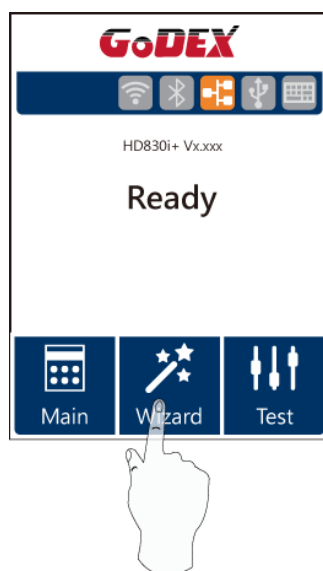

Tap the screen with you finger when you want to select on screen items such as setting icons.

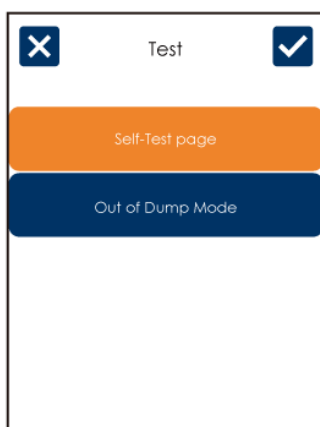

On the ready page, three function mode for setting. You can make various setting function in FUNCTIONAL MODE

Tap "Main"--
Screen could show more detail of "Main"

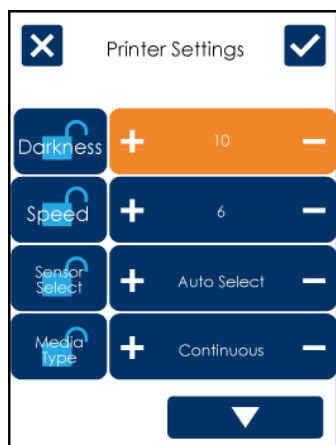

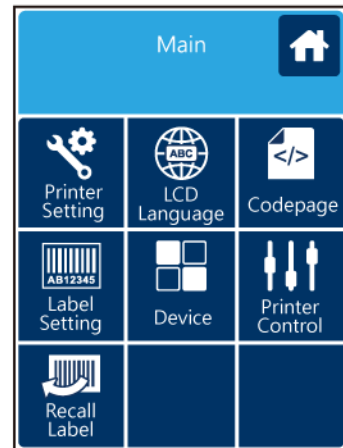

Tap "Wizard"
Set up printer of "Darkness" "Speed"...

Tap "Test"
Self-Test page and Calibration for setting.

finish Setting tap  back
to Main page, if do not
save, tap  system back
to Main page and would
not save any changes.

Unlock

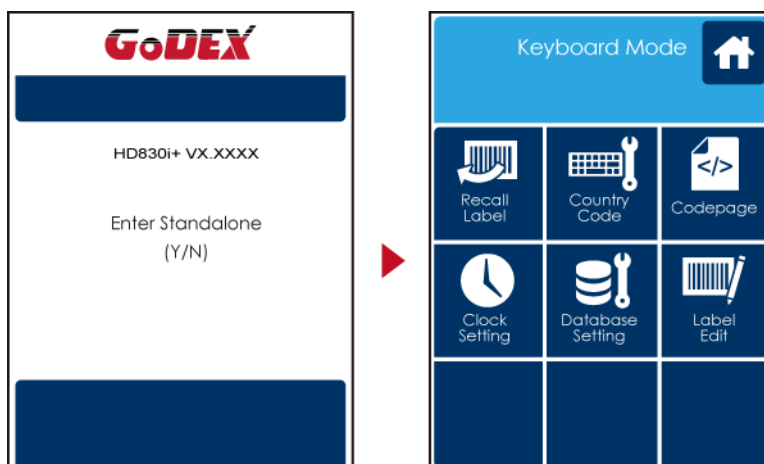

Lock

If printer functions locked, printer can
not modify settings from GoLabel II or
any devices.

Keyboard Mode

When plug-in an USB keyboard to the printer, LCD touch panel will display "Enter Standalone", press the "Y" key on keyboard to entering to the dialog for "Keyboard Mode" operation.

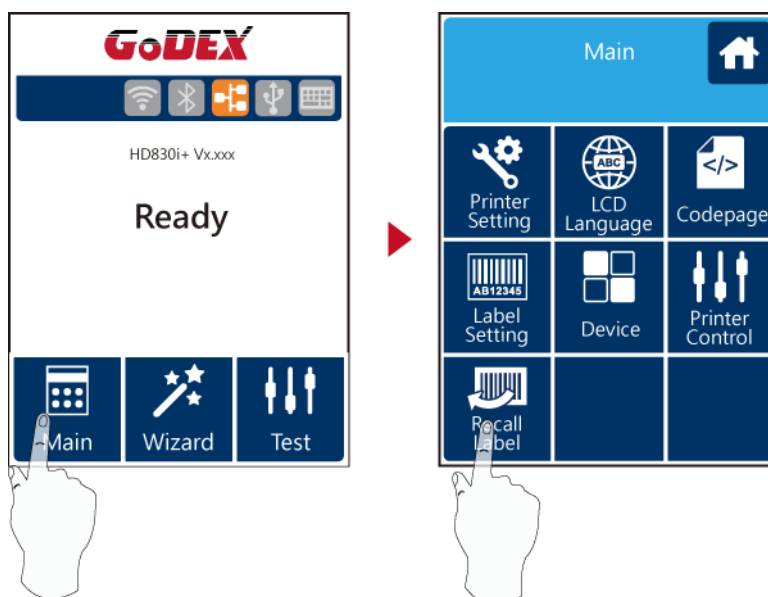

Preview Label function

User can choose any labels to preview it before print it.

From the "Ready" page, tap  to Main page.

From the Main page tap Recall Label to Recall Label page.

From the Recall Label Page the touch panel shown on all labels.
The data processing time will be extend as long as the labels increase.

Tap up to choose labels.

Tap down to choose labels.

Tap Preview Label can see printing label.

Keeping tap  to next page

Label has been printed

3-3 LAN Setting Operation Instruction

Main Menu

	Setting items for printer, ex. Printing speed, darkness. Also includes a Printing Wizard for your ease of printing.
	10 languages for printer setting.
	It consists of a table of values that describes the character set for a particular language.
	Setting items for printing label, ex. Rotation, Printing position offset.
	Providing Buzzer, Option Setting, Smart Backfeed, Serial Port Setting, LAN Setting, LCD Setting, Clock Setting, WiFi Setting, and BT Setting.
	Self-Diagnose functions for printer, ex. Calibration, Self-Test page and Clear Memory.
	Recall Label and preview label.

Device

	Setting off or on for buzzer.
	Setting items for options, ex. Cutter, Label Dispenser, Applicator.
	Setting Programing Language. Auto/EZPL/GEPL/GZPL/GDPL
	Setting items for Serial Port, ex. Baud Rate, Parity, Data Bits, Stop Bits.
	Setting items for LAN, ex. DHCP, IP Adress, Subnet Mask, Gateway.
	Setting items for LCD, ex. off or on for Password function, Correction.
	Setting items for Clock, ex. Year, Month, Day, Hour, Minute and off or on for Visible function.

LCD Operation

When Barcode Printer is Ready, the LCD will display "Ready"

And then the printer is ready to print

If there is any error occur, there will be Error Message shows on the LCD. You could do the trouble shooting according to or contact with the agent.

Icon Definition

	To upper level	Appears on the NAVIGATION ICON of Setting Pages. It guides you back to upper level by touching display upper right icon.
	To main page	Appears on the NAVIGATION ICON of Setting Value Pages. It guides you back to main page by touching display upper left icon.
	Lock	On Setting Value pages, touch display icons to lock the value for preventing unexpected change.
	Unlock	Touch display icons again to unlock the value.

3-4 Label size calibration and SelfTest Page

The printer can automatically detect and store label height. That means the host computer does not need to transmit the label height to the printer. And the self-test function lets you check whether the printer is functioning normally. Here is how you run the label size calibration and self test.

Step.01 ➡ Check that the label stock is loaded correctly.

Step.02 ➡ Switch off the printer.

Step.03 ➡ Switch the printer on again, keeping the FEED button pressed. When the READY LED starts to flash red and the STATUS LED lights up orange, release the FEED button. The printer will now measure the label stock and store the label height

Step.04 ➡ Once the printer has successfully measured the label stock, it will print a self-test label.

The contents of a self-test printout are listed below.

(The data below is for reference only, actual result may vary according to each situation.)

Auto-Calibration

「 Calibration key (C-Button) 」 You could press the calibration key while media been replaced or media error to adjust the media size.

Press and hold the 「 C-Button 」 around 2 seconds, the printer will run the media calibration

Note

* The 「 C-Button 」 function is same as sending command (~S,SENSOR), if run during the printing, the (Print Job) will be deleted and run media calibration. Need to resend the print job after calibration.

3-5 Error Message

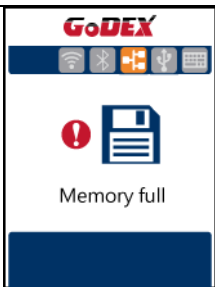

If there is any error occurred during the printing, LCD will display the Error message and also buzzer as warning.

Please refer to below for the error status. °

Operation Panel Status

Operation Panel Status	Type	Beeps	Description	Solution
 TPH opened	Print Head Error	2 x 4 beeps	The printing mechanism is not correctly closed.	Open the print mechanism and close it again.
 TPH overheat	Print Head Error	None	High temperature at the print head.	Once the print head has cooled down, the printer switches to standby mode.
 Check ribbon	Media Error	2 x 3 beeps	No ribbon is installed and the printer displays an error.	Make sure that the printer is set to direct thermal printing mode.
			The ribbon is finished or the label supply hub is not moving.	Replace the ribbon roll.

	Media Error	2 x 2 beeps	No paper is detected.	Make sure that the label sensor is positioned correctly. If the sensor still does not detect the paper, run the autodetection function again.
			Paper is finished.	Replace the label roll.
			Printer feed problem.	Possible reasons: the print medium has become trapped around the rubber roll; the sensor cannot detect a gap or black mark between the labels; there is no paper. Please reset the sensor
  	File Error	2 x 2 beeps	The memory is full. The printer prints the message "File System full".	Delete unnecessary data or install additional memory.
			Unable to find file. The printer prints the message "File Name not found"	Use the "~X4" command to print all files. Then check whether the files exist and whether the names are correct.
			A file of the same name already exists. The printer prints the message "Duplicate Name".	Change the name of the file and try storing it again.

3-6 Connected with USB Devices

Definition : USB Host port supports either device : USB memory stick, USB keyboard or scanner.

Purpose

- USB memory stick : It extends the user memory space for Graphic, Font, Label Format, DBF and Command files downloading. The printer's Firmware also can be updating if copy new version of Firmware into USB memory stick.
- Connecting an USB keyboard to printer for "Keyboard Mode" mode operation.
- Plug-in an USB scanner to operate the printer in "Keyboard Mode" .

Usage of Extended Memory

- USB memory stick : It supports hot-plugging function; printer will create a Folder "\\LABELDIR" and switch "User Flash" to "Extended Memory" automatically while user plugs an USB memory stick into a printer.
- Connect USB with the printer; To connect PC and printer through USB.

Usage of Firmware Update

- Remove USB memory stick from printer and plug-in it to a PC's USB port.
- Copy a new version of Firmware "xxx.bin" to the Folder "\\LABELDIR\\FW"
- Remove USB from PC and plug-in back to the printer. The printer will update the Firmware automatically
- The "\\ LABELDIR \\ FW" directory allows only one file exists, if there are multiple files, the files will be confused.
- Don't remove the USB memory stick out while it's under updating with "Flash Writing..." message that displays on LCD panel.

USB Keyboard

- When plug-in an USB keyboard to the printer, LCD touch panel will display "Enter Standalone", press the "Y" key on keyboard to entering "Keyboard Mode" operation. Under this model can perform "Recall Label", set "Country Code", "Code Page", "Clock Setting", "Database Setting" and "Label Edit".
- Connect a USB keyboard to the printer, if not into the keyboard mode, press the "N" key to leave. Into Standalone mode of operation, to leave the Standalone operation, press "ESC" key to exit.
- After leaving the keyboard mode, for re-entry, press the keyboard "F1" key or reboot, you can follow the steps in the first step choose whether or not (Y / N) into the keyboard mode.

Scanner

- When plug-in an USB scanner to the printer, LCD touch panel will display "Enter Standalone", tap the "Feed" Key to entering "Keyboard Mode" operation.

Note

-
- * The USB Host port on printer is not support "USB HUB" function.
 - * The USB Memory Stick supports with "FAT32" Disk Format and up to 32GB only. The certified venders are Transcend, Apacer, ADATA, Patriot, Consair and Kingston.
 - * The USB Memory Stick only supports download through the printer, On a PC, user may copy entire folder "\\LABELDIR" from USB memory stick to PC or vice-versa. Can not copy the data to USB Memory Stick via PC individually.
 - * External USB Host port is for power 500mA, is not recommended as electronics charging use.

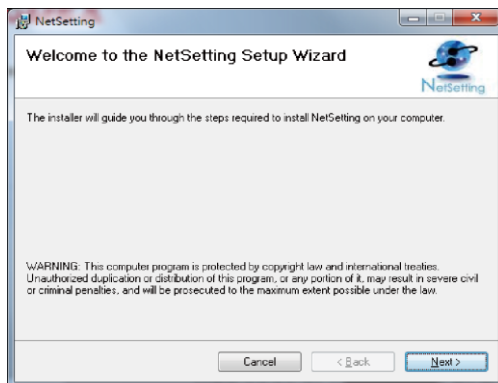

4 Installing the NetSetting software

4-1 Installing the NetSetting

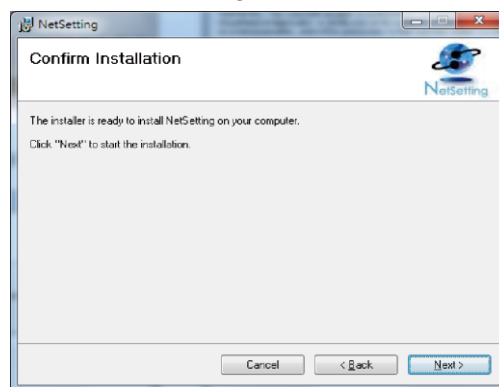

The NetSetting software is used to manage the network configurations when connecting the printer via Ethernet port. It can be downloaded from official website. (www.godexintl.com)

To install the NetSetting, please follow below steps.

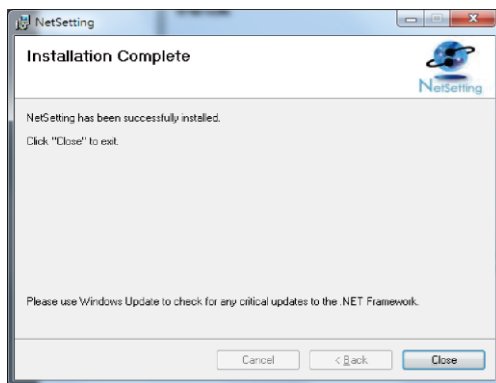

Step.01 ➡ After entering the installation screen as shown below, click "Next"

Step.02 ➡ Specify the "Installation Folder", then click "Next" to installing.

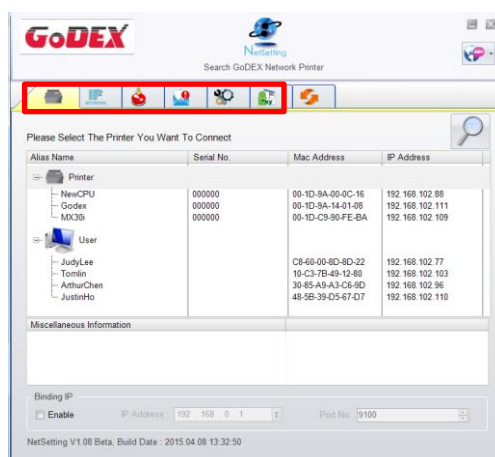

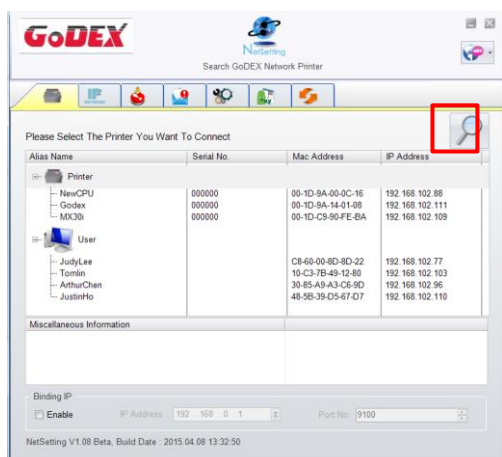

Step.03 ➔ Once the installation is completed, you will see the NetSetting icon on your desktop as right diagram.

4-2 The Interface of NetSetting

GoDEX printer can also be used through a network connection (as a remote network printer), make sure the printer connected to the Internet and the power cord, you can use the Interface of NetSetting to search connected network printers.

Step.01 ➡ Click the NetSetting icon to start the program, you will see the start page as left diagram. Click the magnifier icon to search the Godex printers which are connected via Ethernet port in you network environment (as right diagram).

Step.02 ➡ There are six tabs on the top of interface which can configure different types of network settings. But for the data security reason, you need correct password to enter the configuration pages.

NOTE

* The default password is "1111", you can change the password later from the "IP Setting" tab.

IP Setting

The IP Setting tab can change the printer name, Port number, Gateway setting and the password for configuring the printer. You can also set the printer's IP address either by DHCP or by Static IP.

The screenshot shows the 'GoDEX NetSetting IP Setting' window. The 'Printer Name' is 'Godex' (Length 1~16). The 'Port No.' is '9100'. The 'Default Gateway' is '192.168.0.254'. The 'Password' is '1111' (Length 1~4). The 'Get IP From DHCP Server' radio button is selected. The 'Static IP' radio button is also visible. Below the radio buttons, the 'IP Address' is '192.168.102.55' and the 'Subnet Mask' is '255.255.255.0'. At the bottom, there are 'Set' and 'Refresh' buttons.

You can press "Set" button to apply the settings and "Refresh" button to refresh the setting values.

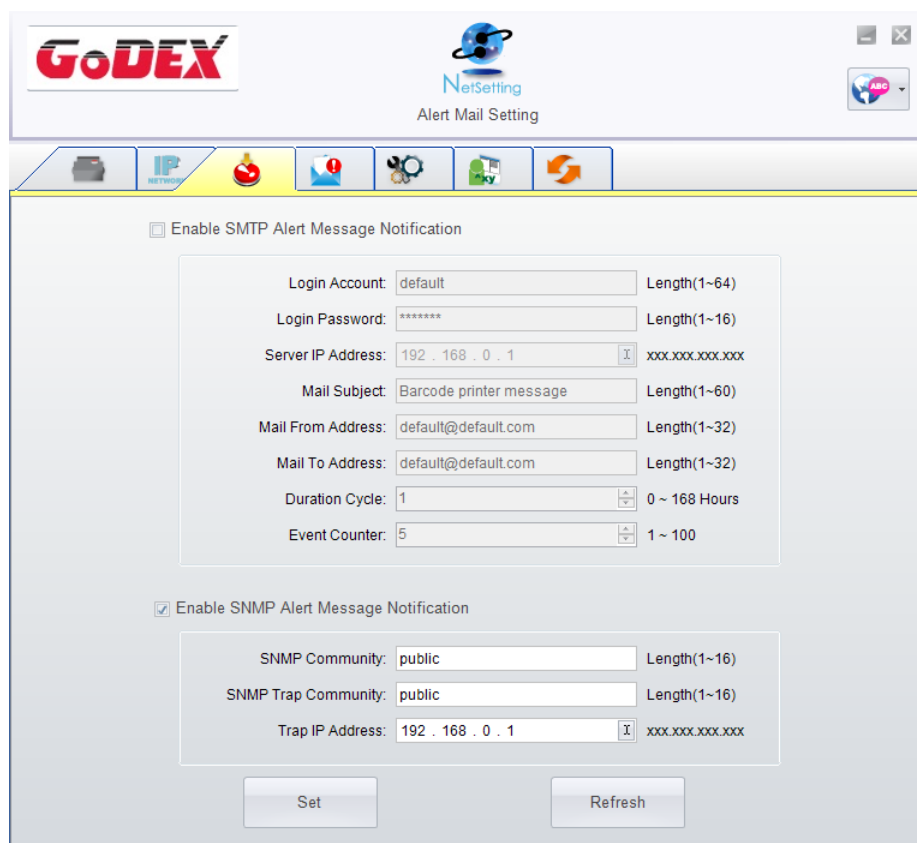

NOTE

* To fully benefit from the NetSetting software, you should be familiar with basic networking principles. Please contact your network administrator for related network setting information.

* When enabling DHCP, if you find the IP Address as: IP = 169.254.229.88, Net mask = 255.255.0.0, Gateway = invariable (last value), the IP Address is invalid.

Alert Path Setting

NetSetting will send the alert messages to designated mail account when the error happened on printer. The alert messages are sent by SMTP (Simple Mail Transfer Protocol) or SNMP (Simple Network Management Protocol). You can set or change the configurations of SMTP and SNMP on this "Alert Path Setting" tab.

The screenshot shows the "Alert Mail Setting" window in the GoDEX NetSetting application. The window has a title bar with the GoDEX logo, the NetSetting logo, and the text "Alert Mail Setting". Below the title bar is a navigation bar with icons for printer, network, alert, settings, and other functions. The main content area is divided into two sections: "Enable SMTP Alert Message Notification" and "Enable SNMP Alert Message Notification".

Enable SMTP Alert Message Notification (checkbox is unchecked):

- Login Account: default (Length(1~64))
- Login Password: ***** (Length(1~16))
- Server IP Address: 192 . 168 . 0 . 1 (Length(1~16))
- Mail Subject: Barcode printer message (Length(1~60))
- Mail From Address: default@default.com (Length(1~32))
- Mail To Address: default@default.com (Length(1~32))
- Duration Cycle: 1 (0 ~ 168 Hours)
- Event Counter: 5 (1 ~ 100)

Enable SNMP Alert Message Notification (checkbox is checked):

- SNMP Community: public (Length(1~16))
- SNMP Trap Community: public (Length(1~16))
- Trap IP Address: 192 . 168 . 0 . 1 (Length(1~16))

At the bottom of the window are two buttons: "Set" and "Refresh".

You can press "Set" button to apply the settings and "Refresh" button to refresh the setting values.

Alert Message Setting

For the alert message notification function, you can decide which error cases need to be sent out to the operator. Moreover, the alert messages can be set to be sent by SMTP, SNMP or both.

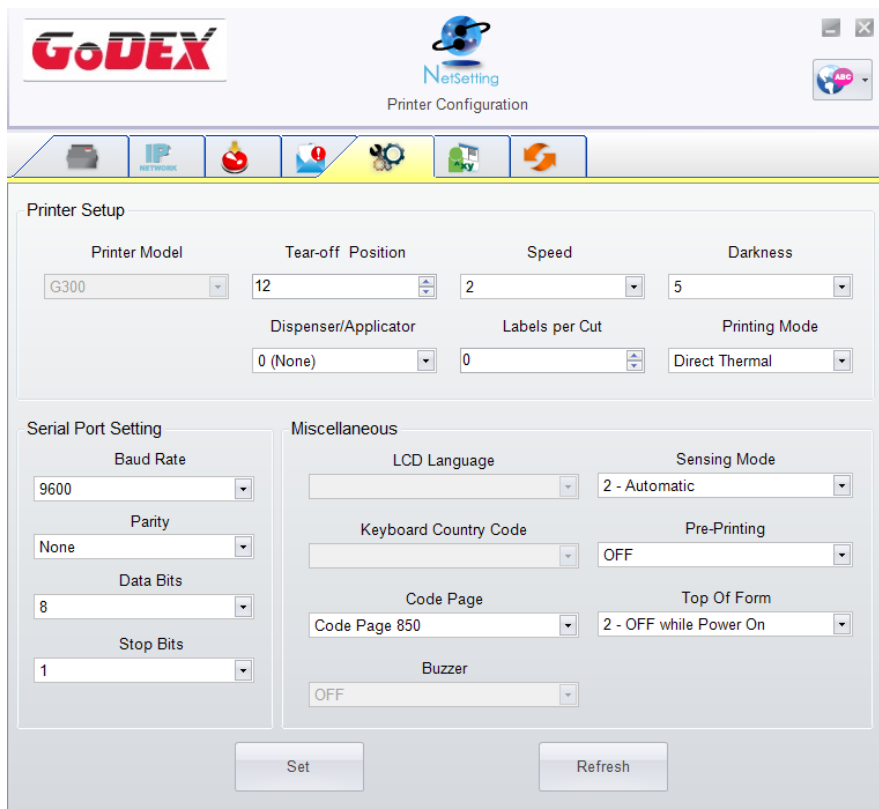

SMTP	SNMP	Description
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Paper or Ribbon Empty
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Paper Jam
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Ribbon Out
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Printhead Up (Open)
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Rewinder Full
<input type="checkbox"/>	<input checked="" type="checkbox"/>	File System Full
<input type="checkbox"/>	<input checked="" type="checkbox"/>	File Not Found
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Duplicated Name
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Syntax Unknown
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Cutter Jammed or Not Installed
<input type="checkbox"/>	<input checked="" type="checkbox"/>	TPH Over Heat

Set Refresh

You can press "Set" button to apply the settings and "Refresh" button to refresh the setting values.

Printer Configuration

Set or change the configurations of connected printer. Most of key settings for the printer operation can be done by this setting page.

The image shows the 'GoDEX NetSetting Printer Configuration' window. The title bar includes the GoDEX logo, the NetSetting logo, and the text 'Printer Configuration'. Below the title bar is a navigation bar with icons for printer, IP, network, and other settings. The main content area is divided into two sections: 'Printer Setup' and 'Miscellaneous'. The 'Printer Setup' section contains settings for Printer Model (G300), Tear-off Position (12), Speed (2), Darkness (5), Dispenser/Applicator (0 (None)), Labels per Cut (0), and Printing Mode (Direct Thermal). The 'Miscellaneous' section contains settings for LCD Language, Sensing Mode (2 - Automatic), Keyboard Country Code, Pre-Printing (OFF), Code Page (Code Page 850), Top Of Form (2 - OFF while Power On), and Buzzer (OFF). At the bottom of the window are 'Set' and 'Refresh' buttons.

Printer Setup			
Printer Model	Tear-off Position	Speed	Darkness
G300	12	2	5
Dispenser/Applicator		Labels per Cut	Printing Mode
0 (None)		0	Direct Thermal

Serial Port Setting		Miscellaneous	
Baud Rate	9600	LCD Language	Sensing Mode
Parity	None		2 - Automatic
Data Bits	8	Keyboard Country Code	Pre-Printing
Stop Bits	1		OFF
		Code Page	Top Of Form
		Code Page 850	2 - OFF while Power On
		Buzzer	
		OFF	

Set Refresh

You can press "Set" button to apply the settings and "Refresh" button to refresh the setting values.

User Command

The "User Command" tab provides a communication interface for operator to control the printer. Input printer commands in "Input Command" window and press "Send Command" button, the commands will be sent to the printer. For some commands that will return response message, the message will be displayed in "Output Message" window.

You can press "Set" button to apply the settings and "Refresh" button to refresh the setting values.

Firmware Download

On “Firmware Download” tab, the current version of printer firmware will be showed on the screen. If you need to update the printer firmware, just specify the file location of firmware file and press “Start Download Firmware” button. The printer firmware then can be updated remotely.

In addition to the firmware update, you can press “Recover To Factory Settings” button to restore the printer configurations back to factory default.

5 Barcode Printer Options

5-1 Pre -step for Options Installation

Before install the options, please follow the pre-Step 1st.

1. **Power off Barcode Printer**
(Please must be turn off the power before any options installation)
2. **Open the Top Cover**

Note

- * Make sure the printer is power off status before cutter installation.
- ** The linerless media is not suitable for this option cutter.

5-2 Cutter Installation

Cutter parts introduction

Cutter Module Installation Steps:

(Following Steps must be under printer power off condition)

Step 1. Disassemble the bottom case screws (Marked in Red circle)

Note

- * Before cutter installation, make sure the printer is under power off condition or the power cord is not plugged !
- ** The linerless media is not available supported.
- *** The maximum cutting width is 230 mm · the minimum cutting height is 30 mm above. (If over the range then it's not under warranty condition)
- **** Suggested Stop Position for Cutter is (^E) 29~30 °

Step 2.

(No. 1) Release the TPH lock

(No. 2) Follow the direction to open the print frame.

(No. 3 and 4) Take off the front panel

Step 3.

(No. 1) Connecting the cutter cable into printer

(No. 2) Hook the Cutter module into position.

(No. 3) Follow the direction to put the cutter motor into position (mark in red circle)

Step 4. Fasten the screw in position.

Assembly completely show as below

Note

* Please must make sure the power is off status before any installation for the security purpose.

5-3 WiFi/BT Combo Module Installation(031-W02001-000)

Step 1.

Step 2.

Step 3.

Step 4.

Step 5.

Step 6.

5-4 Main Board Connector Position

Nr.	Content	Nr.	Content
1	Calibration Button	11	TPH
2	Ethernet Port	12	LCD
3	RS-232 Port	13	Receive Sensor
4	USB Port	14	Door open switch
5	USB Host	15	See-Through Sensor
6	Cutter & Label Dispenser	16	Black Mark Sensor
7	RFID#1	17	Ribbon Out Sensor
8	RFID#2	18	WiFi/BT combo module
9	Motor	19	LPT/Applicator
10	Power		

6 Maintenance and Adjustment

6-1 Print Head Replacement

Step 1.

(No. 1) Release the TPH lock.

(No. 2) Follow the direction to open the Print frame.

(No. 3) Remove the TPH cover screws.

Step 2.

(No. 1) Follow the direction to roll down the TPH module.

(No. 2) Follow the direction to take out the thumb screws

(No. 3) Take off the TPH module from the connector.

Note

* Make sure the printer is power off status before TPH replacement.

6-2 Print Line Adjustment

1. Lift up the top cover.

2. Use the flat screw driver

Print line Adjust

TPH print line adjustment:

To have good print quality in hardness or thicker media, we will suggest to move the print line a little bit forward (paper feeding direction) . And it will be able to apply the flat screw driver(as above figure) turn in clockwise or counter clockwise to rotate the screws (A) to move back or forward the TPH position. The adjustment screw (A) of the left and right side of the print head position adjustment should be adjusted so that the print line is parallel to the center line of the roller. Adjust the screw (A) to rotate one turn, the print head displacement stroke is 0.5mm, it is recommended to adjust the way progressive, each time to adjust the 1/4 turn to confirm the print quality situation. (A) Turn the adjustment screw (A) on the left and right sides to the position where the adjustment line is aligned with the indicating line, and return to the original position and then adjust it again according to the above adjustment method.

6-3 Ribbon Tension Adjustment

1. Lift up the top cover

6-4 Print Head Cleaning

Dirt on the print head or ribbon, or glue residue from the label stock may result in inadequate print quality. The printer cover must therefore always be closed during printing. Keeping dirt and dust away from the paper or labels ensures a good print quality and a longer lifespan of the print head. °

Print Head Cleaning Steps

- Step.01 Switch off the printer.
- Step.02 Open the printer cover.
- Step.03 Release the printing mechanism and lift it.
- Step.04 Remove the ribbon
- Step.05 To remove any label residue or other dirt from the print head (see red arrow), please use a soft lint-free cloth dipped in alcohol

Note

- * The print head should be cleaned once a week.
- ** Please make sure that there are no metal fragments or other hard particles on the soft cloth

used to clean the print head.

6-5 Print Head Pressure Adjustment

When printing on special media (with varying material thickness), the print quality may suffer. You will then need to adjust the print head pressure.

Adjustment Steps

Step.01 ➡ Open the printer cover.

Step.02 ➡ Remove the ribbon.

Step.03 ➡ Use a screw driver and slowly turn the adjustment screws for the print head to increase or reduce the print head pressure. Do not screw it hard, otherwise the machine will be broken.

Step.04 ➡ Turn the adjustment screws according to actual position which is unsuccessful printed. Turn towards + (Plus) indicates : The pressure is increased ; Turn towards – (Minus) indicates: The pressure is reduced.

SCREW (LEFT)

Screw for adjusting the print head
pressure on left side

SCREW (RIGHT)

Screw for adjusting the print head
pressure on right side

6-6 Ribbon Wrinkle Adjustment

The use of different ribbon materials may cause wrinkling of the ribbon, which in turn affects the print result as illustrated by the examples in (a) and (b). To change the print result, you can adjust the ribbon shield screws. If your print result looks like the example in (a), you need

To keep track of the change in print quality, you should adjust the screws by half a turn at a time. Print a test page. If there is no improvement in the print result, turn the screw by another half turn. Do not turn the adjustment screw more than two full turns.

Note

* If you adjust the screw by more than two full turns, the paper feed may no longer function correctly. In that case, unscrew the ribbon shield screws fully and restart the adjustment process.

6-7 Cutter Error Trouble Shooting

While using the cutter, paper jams may occur. Please follow the below steps to clean the paper jam.

A socket head screw for adjusting the cutter is located on the bottom of cutter module, as shown in below illustration.

Guillotine Cutter

➤ Cleaning Steps

Step.01 ➡ Switch off the printer.

Step.02 ➡ Use a Philips screwdriver to turn the socket head screw and release the knife.

Step.03 ➡ When you have cleared the paper jam, switch on the printer again. The cutter will automatically reset.

Note

* Make sure power is off status before repairing.

** Labels should be at least 30 mm high to ensure correct functioning of the cutter °

6-8 Trouble Shooting

Problem	Solution
The printer is switched on but the display does not light up.	<ul style="list-style-type: none"> ◆ Check the power supply. °
One or both LEDs light up red and printing is interrupted.	<ul style="list-style-type: none"> ◆ Check the software settings (driver settings) or command codes. ◆ Look for the error alert in the table in Section 3-3 Error alerts . ◆ Check whether the cutter is functioning normally and whether it is cutting at all. (Only if a cutter is installed.)
The label stock passes through the printer but no image is printed.	<ul style="list-style-type: none"> ◆ Please make sure that the label stock is loaded the right way up and that it is suitable material. ◆ Please make sure that the ribbon is loaded correctly.
The label stock jams during printing.	<ul style="list-style-type: none"> ◆ Clear the paper jam. Remove any label material left on the thermal print head and clean the print head using a soft lint-free cloth dipped in alcohol.
There is no printed image on part of the label or the image is blurred.	<ul style="list-style-type: none"> ◆ Check the thermal print head for dust or other dirt (label material or ribbon residue). ◆ Check for errors in the application software. ◆ Check the ribbon for wrinkles. ◆ Check the power supply. ◆ Run a self test (Section 3-2) and check the test print pattern to see whether the print head prints over the entire width of the medium. ◆ Check the quality of the print medium.
The printed image is positioned incorrectly or a label is missed out during printing.	<ul style="list-style-type: none"> ◆ Run the Label size calibration function. (Section 3-2) ◆ Check the label height setting. ◆ Check whether there is paper or dust covering the sensor. ◆ Check the paper guide settings.
The cutter does not cut off the labels in a straight line.	<ul style="list-style-type: none"> ◆ Check whether the label stock is positioned straight.
The cutter does not cut off the labels completely.	<ul style="list-style-type: none"> ◆ Check whether the label is more than 0.2 mm thick.
When using the cutter, the labels are not fed through or cut off incorrectly.	<ul style="list-style-type: none"> ◆ Check whether the cutter has been correctly installed. ◆ Check whether the paper guides are functioning correctly.
The label dispenser is not functioning normally.	<ul style="list-style-type: none"> ◆ Check whether there is dust on the label dispenser. ◆ Check whether the label stock is positioned correctly.

NOTE

* If any problems occur that are not described here, please contact your dealer.

Appendix - Printer Specification

Model Name		HD830i+
Print Method		Thermal Transfer / Direct Thermal
Resolution		300 dpi (12 dot/mm)
Print Speed		5 ips (127 mm/s)
Print Width		8.64" (219.5 mm)
Print Length		Min. 1" (25.4 mm)** ; Max. 50.09" (1500 mm)
Processor		32-bit RISC CPU
Memory	Flash	256 MB
	SDRAM	256 MB
Sensor Type		Adjustable reflective sensor and transmissive sensor, central aligned
Media	Type	Continuous form, gap labels, black mark sensing, and punched hole; label length set by auto sensing or programming
	Width	Tear : Min. 4" (102 mm) – Max. 10" (254 mm) Cutter : Max. 9.05" (230 mm)
	Thickness	Min. 0.0024" (0.06 mm) – Max. 0.01" (0.25 mm)
	Label roll diameter	Max. 10" (254 mm)
	Core diameter	Min. 1.5" (25.4 mm) – Max. 3" (76.2 mm)
Ribbon	Types	Wax, wax/resin, resin
	Length	Max. 981' (300 m)
	Width	Min. 1.18" (30 mm) – Max. 8.66" (220 mm)
	Ribbon roll diameter	2.67" (68 mm)
	Core diameter	1" (25.4 mm)
Software	Label design software	GoLabel II (for EZPL only) (Windows)

USER MANUAL
APPENDIX
WiFi Setting

Steps for setting Wi-Fi module

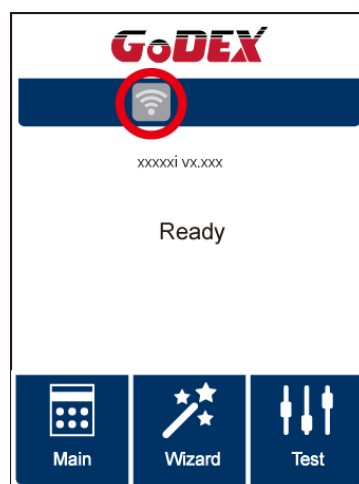

Step 1. Power off the printer.

Step 2. Install the Wi-Fi module.

Note : Methods for installing Wi-Fi module, please refer to Wi-Fi module installation.

Step 3. Power on the printer and wait 15 seconds. The main manu will display gray Wi-Fi icon and it means that the Wi-Fi module is already

detected by the printer, as the figure below indicates.

Note

- * The firmware version of the printer should be above V.2005, otherwise you can not use Wi-Fi function.
- ** GoLabel version should be above V1.12, otherwise you can not use Wi-Fi Tool function.
- *** When a Wi-Fi module is installed into a printer, the Ethernet of the printer will lose its function.

Steps for setting Access Point (D-Link)

Step 1. Execute browser and log in the setting page of access point.

Step 2. Click "WIRELESS SETUP" on the left side of the setting page (red circle 1) and enter into AP setting page.

For the contents of setting, please refer to the figure below.

Step 3. Click "Save Settings" button after the Wi-Fi AP is completely set.

After approx.20 Seconds, the setting of AP is stored and takes effect.

The screenshot shows the 'WIRELESS NETWORK' configuration page for a D-Link DAP-1360. The page is divided into several sections: 'WIRELESS NETWORK', 'WIRELESS SECURITY MODE', and 'PRE-SHARED KEY'. Red arrows and numbers (1-5) highlight specific elements: 1 points to the 'WIRELESS SETUP' link in the left sidebar; 2 points to the 'Wireless Network Name' field, which contains 'MXAP'; 3 points to the 'Security Mode' dropdown, set to 'WPA-Personal'; 4 points to the 'Pre-Shared Key' field, which contains '8L0K9M6B0CFB7JIDGDA7J53QMB'; and 5 points to the 'Save Settings' button at the top of the main content area. The page also includes a 'Helpful Hints...' sidebar on the right with information about wireless modes, hidden wireless, and security keys.

WIRELESS NETWORK

Use this section to configure the wireless settings for your D-Link Access Point. Please note that changes made on this section may also need to be duplicated on your wireless client.

Save Settings **Don't Save Settings** **Save Settings**

WIRELESS NETWORK SETTINGS :

5 Enable Wireless : ☒ Always **Add New**

Wireless Mode : Access Point **Site Survey**

2 Wireless Network Name : MXAP (Also called the SSID) **Wireless Network Name**

802.11 Mode : Mixed 802.11n, 802.11g and 802.11b

Wireless Channel : 10

Enable Auto Channel Scan : ☐

Channel Width : Auto 20/40MHz

Visibility Status : ☐ (Also called Disable SSID Broadcast)

WIRELESS SECURITY MODE :

Security Mode : WPA-Personal **3 Security Mode**

WPA

Use WPA of WPA2 mode to achieve a balance of strong security and best compatibility. This mode uses WPA for legacy clients while maintaining higher security with stations that are WPA2 capable. Also the strongest cipher that the client supports will be used. For security use WPA2 Only mode. This mode uses AES(CCMP) cipher and legacy stations are not able to access some gaming and legacy devices work only in this mode.

To achieve better wireless performance use WPA2 Only security mode (or in other words AES cipher)

WPA Mode : WPA only

Cipher Type : AES

PRE-SHARED KEY

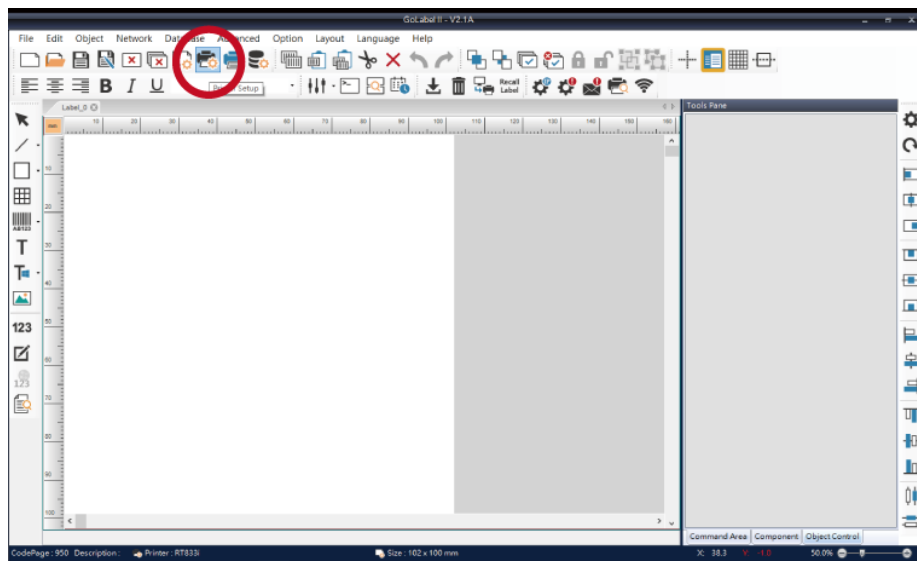

Enter an 8 to 63 character alphanumeric pass-phrase. For good security it should be 12 characters length and should not be a commonly known phrase.

4 **Code**

Pre-Shared Key : 8L0K9M6B0CFB7JIDGDA7J53QMB

Set up wireless network through GoDEX WiFi tool

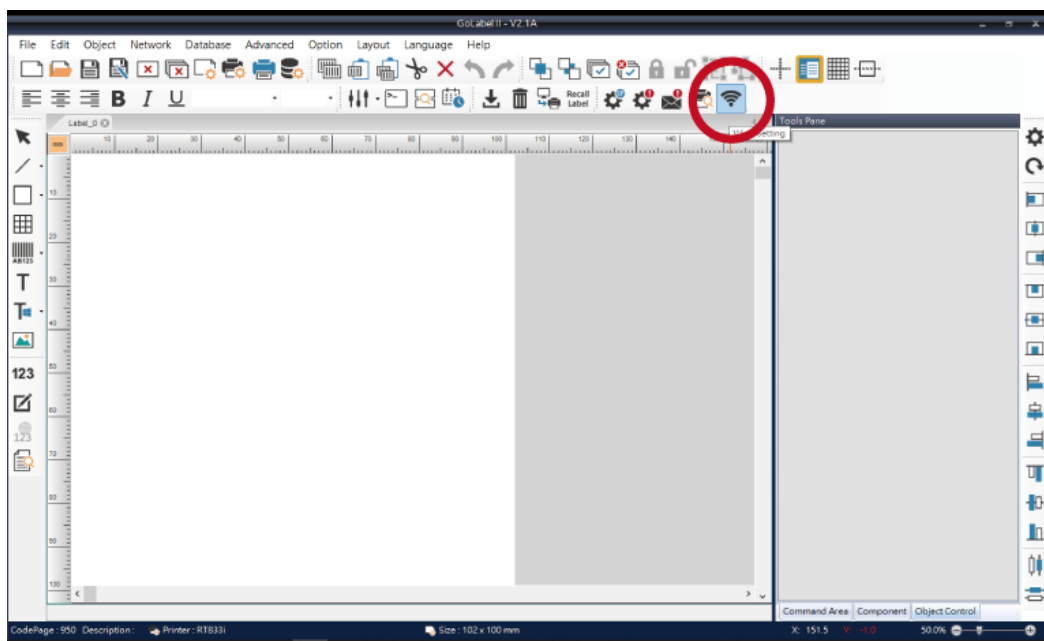

1. Turn on the printer, connect printer and computer by USB cable.
2. Start GoLabel II
3. Click "Printer Setup"

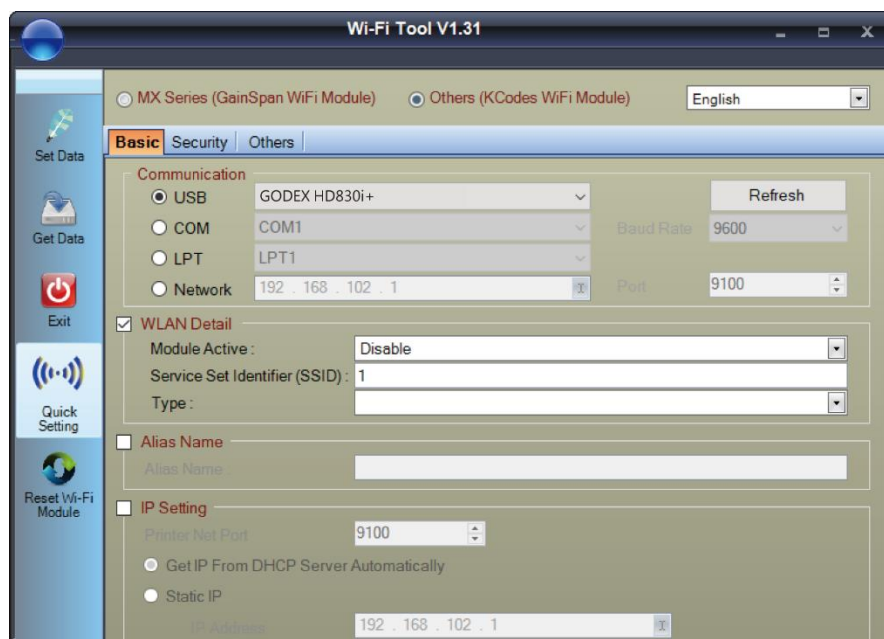

4. Select printer model (Wi-Fi supported models).

5. Click” WiFi Setting” icon.

6. Click” WiFi Setting” icon.

8. Select server and click **Next** button.

<Step.1> Search Wi-Fi

It shows maximum 16 pairs information of devices * It disconnects current connection when functioning, after creating a successful connection.

HD830i+ User Manual APPENDIX

FILE MANIPULATION WHEN USING USB STICK

File Manipulation

The files in both devices (USB memory stick and printer internal Flash memory) are able to copy and move by the commands "~MCPY" and "MMOV" that sends from GoLabel on a PC via either connection – USB or Ethernet ports.

•Copy

Syntax	~MCPY,s:o.x,d:o.x
Parameter	s = source device of stored object (s = D (for USB memory stick;) or F (for internal Flash memory)) d = destination device of stored object o = object name , "o" is substituted for " * " x = extension (file type), the type "x" is substituted by "*" , or following either one: = D, database = A, Asia font = C, TTF font = E, Bit-Mapped font = F, label form = G, graphic = S, serial file = T, text = B, Unicode Table
Description	Copy file from USB memory stick to Flash memory, or vise-versa
Example	~MCPY,F:*.F,D:*.F ~MCPY,D:*.G,F:

•Move

Syntax	~MMOV,s:o.x,d:o.x
Parameter	s = source device of stored object ("D" for USB memory stick; "F" for internal Flash memory d = destination device of stored object o = object name (file name); the name "o" is substituted for "*" " x = extension (file type), the type "x" is substituted by "*" , or following either one: = D, database = A, Asia font = C, TTF font = E, Bit-Mapped font = F, label form = G, graphic = S, serial file = T, text = B, Unicode Table
Description	Move file
Example	~MMOV,F:*.F,D:*.F ~MMOV,D:*.G,F:
